Colonel Anderson is still guarded in his statements concerning his plans. He said last night that the papers had all no could give out about the military, and that there would be no removal of the entire military guard just yet. It was ascertained from other sources that a conference was held yesterday at which

Dr. Witherspoon's Testimony,
The conpection of Dr. Witherspoon with
the case is as a witness, who can show
conclusively that there is no ground
whatever for the allegation. He regrets
the necessity for his appearance in the

Tor. Witherspoon has known Mr. Buchnan, and he is in a position to state
definitely that the superintendent is not
the chameleon he is held up to be. At
one time Dr. Witherspoon was pastor in
Okolona, Aliss, where Mr. Buchanan was
born and where the Richmond minister
knew him as a boy, three or four years
of age. His acquaintance with him has
extended from that time to this. Mr.
Buchanan is an ephew of Dr. Buchanan,
the distinguished physician, and of Colonel McIntosh, once attorney for the Postal Telegraph Company here. He has a
cousin in Richmond in the person of Mrs.
Ernest Sræilman, a daughter of Colonel
McIntosh.

THREAD OF LEO'S LIFE AS YET UNBROKEN

POPE GROWS WEAKER

ROME, July 8, 8.50 P. M .-The day has passed without any attack of fainting, although the Pope has grown steadily weaker and is now greatly prostrated. While the Pope lies on his death bed the finger of death seems also to have touched one of his signor Valponi, whom he but the other day appointed secretary of the Consistorial congregation. Monsignor Valponi was stricken with syncope to-day. He fell to the floor, but was carried to his apartment and Dr. Lapponi was hurrledly summoned from the Pope's bedside.

The official bulletin of the Pope's condition was issued at 8.15 this evening, as follows:

'The remainder of the day has passed without recurrence of fainting attacks. The pulse is less frequent, but a little more regular. The breathing is calm and the general condition im-

Odom set sail and was close to Bullman when they turned into the stretch. Then Waterboy and Roehampton left the rest of the field, rapidly drawing away together, with the big, long striding black horse forging surely ahead. It was Waterboy's race a sixteenth of a mile from home, and Odom eased his mount a trifle. Bullman suddenly shook up Roehampton, and the little chesinut was again neck and neck with the black, but one flourish of Odom's whip sent Waterboy has raced eight times in his life; finished first six times, and made two records. To the winner the Brighton was worth \$18,509.

When this become known many were disposed to criticize the doctors for permitting such an exhausting effort, but it was explained that the entire absence of fever, the temperature being even below normal, eliminated the danger of syncope from this exertion. Moreover, the attending physicians recognized that they were battling with a man of iron will, who does not know the meaning of restraint. Fortunately all the climatic conditions in Rome for the time being are favorable to the sufferer.

The encouraging conditions are further augmented by the constant use of artificial means of exhibitantion, including steady supplies of oxygen.

The later official bulletin, following a consultation between Drs. Lappont and Mazzoni, completely contradicted the alarmist reports, and gave a most favorable statement. This was disclosed in the improved pulse, better respiration and ameliorated general condition. Dr. Mazzoni said in a conversation following the issuance of the 8:15 P.
